

THE OFFICE OF  
REPUBLICAN LEADER  
KEVIN MCCARTHY

# THE DEMOCRATS' SOCIALIST SCAM

*Coordinated Messaging Dates:*

**Thursday, October 21st**

**1**

## **Mass Amnesty**

The bill offers amnesty for millions of people living in the country illegally and will worsen the ongoing border crisis. It creates free citizenship for up to 10 million illegal immigrants, and makes them eligible to receive federal benefits, all while providing no funding for border wall construction, technology, or additional Border Patrol agents.

**Friday, October 22nd**

**2**

## **Taxpayer-Funded Abortions**

For 50 years, there has been long-standing bipartisan agreement on the Hyde Amendment, which prevents taxpayer dollars from funding abortions. Democrats in Washington want to break that long-standing precedent by not placing any Hyde protections on subsidies given to purchase federal health plans and allowing health care programs to pay for abortions. They now want any pro-life, tax-paying American to pay for something they fundamentally disagree with and that may violate their religious liberties.

**Tuesday, October 26th**

**3**

## **Heat Your Home Tax**

This bill authorizes the EPA to assess a \$1500 tax per ton of methane emissions on energy producers, processors, transmission, storage, import/export, and pipelines. As many as 90,000 jobs could be lost and Americans' heating bills will increase by up to \$242 per year, which is in addition to the 54% price increase Americans are already bracing for this upcoming winter.

**Wednesday, October 27th**

**4**

## **Higher Gas Prices**

Imposes arbitrary drilling moratoriums on federal lands that will increase fees and royalties on onshore and offshore oil and gas production. This will continue to make gas prices skyrocket, which are already at a 7-year high, and could potentially destroy hundreds of thousands of jobs.

**Thursday, October 28th**

**5**

## **IRS Surveillance**

Requires banks, credit unions, fintechs, and other financial firms to report transaction information to the IRS for any account where withdrawals or deposits reaches a threshold of just \$28 per day on average over the year. This bill also provides the IRS with an extra \$80 billion to hire 85,000 new bureaucrats to sift through this new reporting and spy on American individuals and families.

**Tuesday, November 2nd**

**6**

## **Local Business Taxes, Regulations, & Reduced Workforce**

Increases the individual tax rates for many small business owners, while reducing the pass-through deduction, and would destroy at least 131,000 jobs. This bill also increases OSHA penalties by 512% across the board and Fair Labor Standards Act penalties by 900%. The Democrats will eliminate the minimum income threshold from the Child Tax Credit and make it fully refundable. This means it will pay the same whether you are working or not, exacerbating our current labor shortage.

**Wednesday, November 3rd**

**7**

## **Nationalized Elementary Schools**

Gives the Education Secretary the ability to approve early education standards, provides child care to wealthy families and will push small providers out of the market.

**Thursday, November 4th**

**8**

## **Made in America Tax**

The Made in America tax in this bill will increase corporate tax rate to 26.5% and kill 107,000 full-time jobs. It permanently stops key domestic mineral development and allows China to continue to have a monopoly in the critical mineral market. Creates an international tax regime that charges American businesses more in every country around the world than their foreign competitors, making it better to be a foreign company or foreign worker than to be an American company or American worker.

**Friday, November 5th**

**9**

## **Socialized Medicine**

This government price control system (H.R. 3) will prevent life-saving drugs from coming to the market. It will destroy innovation in treatments for rare diseases. Reports indicate this legislation can result in 100 fewer new life-saving drugs and cures. It will especially negatively impact seniors, patients, those with rare diseases, and their families.
